

Agentic AI in Finance

Agentic AI vs. Traditional Rule-based AI in Finance

Tom Taulli

Author of Building Generative AI Agents: Using LangGraph, AutoGen, and CrewAI

@ttaulli

Autonomy

Reasoning and planning

Multi-agent collaboration

Perception

Proactive

Continuous learning

Memory

Benefits of AI Agents

Improved productivity

Lower costs

Better decision-making

Personalization

SaaS Platforms

A growing number are adding agentic features

Pros and Cons of SaaS Platforms

Leverage existing
data and workflows

Prebuilt features

Governance,
compliance and
security

Higher costs

Difficulties with
migrations

Less flexibility

Open-source Frameworks

Some of the top ones include LangChain and LangGraph, AutoGen, CrewAI, and Haystack.

Pros and Cons of Open-source Frameworks

More flexibility

Host locally

Higher costs

Cloud Platforms

The top ones include AWS, Microsoft Azure,
and Google.

Pros and Cons of Cloud Platforms

Sophisticated agentic AI tools and services

Scalability and security

Deep integrations

Higher costs

Self-Hosted

This is on-premises or private cloud.

Pros and Cons of the Self-hosted Option

Control

Data, security, and customization

Expensive and complex

Need an experienced team with data science and DevOps

Hybrid

This is a combination of the public and private clouds.

Use Cases

**Autonomous risk
assessment**

**Real-time
compliance
monitoring**

Financial advising

Real-world Examples of Agentic AI in Finance

Use Case: Capital One's Chat Concierge

Client retention and engagement

Improve car-buying process

Multi-agent collaboration

Meta's open-source models

Upgrade vehicle

Sophisticated checks to mitigate hallucinations and errors

Improved the consumer experience and satisfaction, but it has also been helpful for auto dealers

Use Case: UBS

Personalization

Microsoft Azure

Custom solution

**Queryable
knowledge base**

**Sophisticated
retrieval techniques**

**Improved client
satisfaction**

Use Case: Bank of New York Mellon

Background

Google Cloud

Predictions
