AI Agents for Security

Fraud Detection

The traditional approach to fraud detection for financial institutions is mostly about setting up systems with complex rules.

Using Agentic AI

**Wells Fargo's AI
Agents**

Context of the Data

**System is constantly
evolving**

Compliance Environments

Financial services firms must deal with one of the most extensive and complex compliance environments.

Agentic AI Approaches

**Dynamic monitoring
and adaption**

**Coordinate across
multiple compliance
domains**

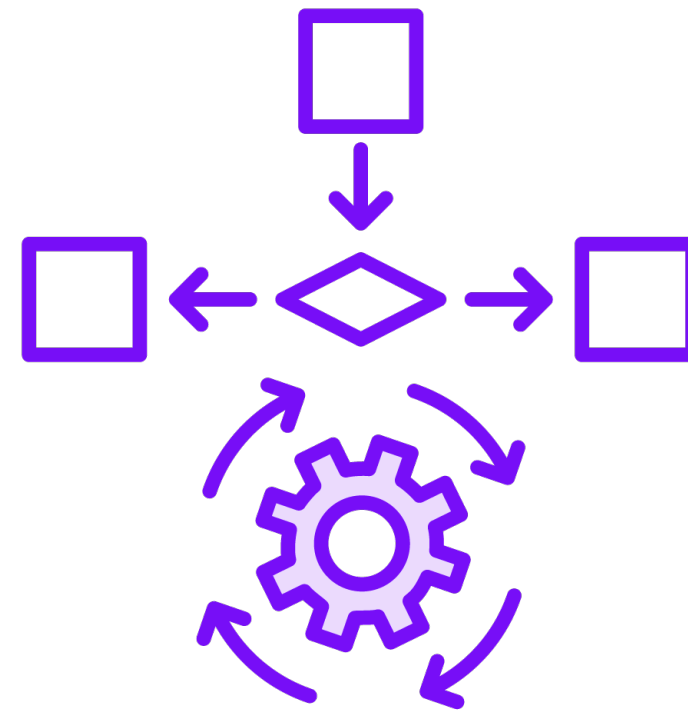

**Manage a rapidly
evolving regulatory
environment**

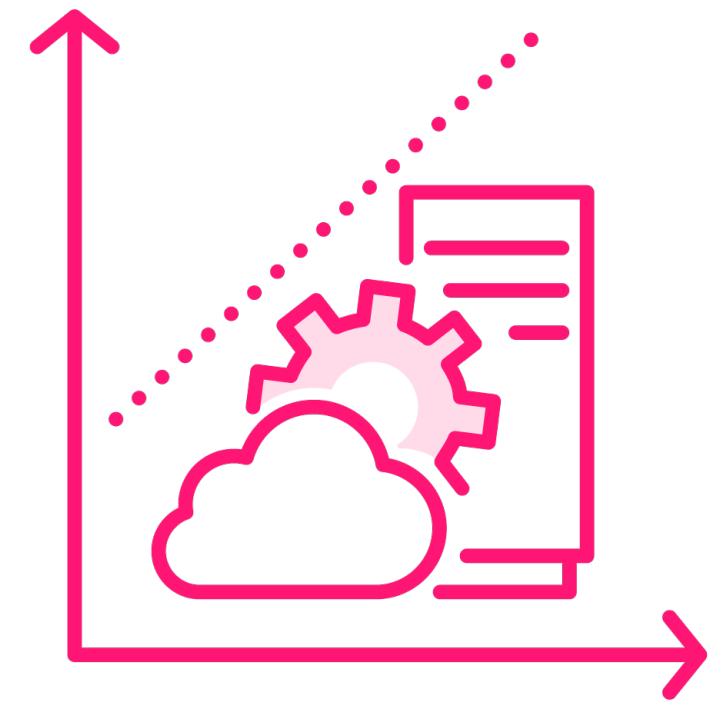

JPMorgan's Legal Agentic Workflows (LAW)

**Limitations of generic
LLMs**

**Combines specialized
text agents and
domain-specific tools**

**More scalable and
cost-effective**

Responsible AI and Agents

Core Principles of Responsible AI

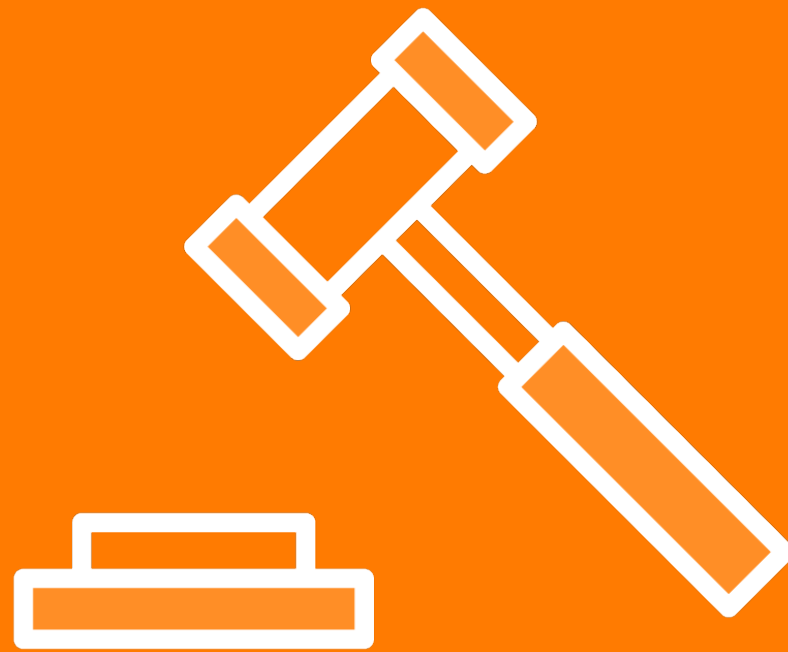

Fairness and non-discrimination

Transparency and explainability

Privacy and data protection

Accountability and governance

Challenges of Regulations

What may have made sense yesterday may not
today or tomorrow.

Lending Laws

Equal Credit Opportunity Act (ECOA)

- Prohibits discrimination in any aspect of a credit transaction
- Race color, religion, national origin, sex, marital status, and age
- Regulation B

Fair Housing Act (FHA)

- Prohibits discrimination in housing-related transactions
- Mortgages, rentals, and housing ads
- The Department of Housing and Urban Development
