@taulli

Alignment

It's about focusing on business objectives.

SMART Framework

Specific

Measurable

Achievable

Relevant

Time-bound

Use Case for an AI Agent

Specific goal: Develop an AI chatbot to handle Tier 1 support queries, such as password resets and order tracking.

Measurable goal: Reduce average customer handling time by 15%.

Achievable goal: Ensure the AI can accurately address 80% of frequently asked questions.

Handling support queries is relevant for many businesses.

Time-bound: Two months from the start of the project.

Security and Privacy

Data protection

Access controls

Bias mitigation

Impact of AI Agents on Team Workflows and Productivity

Quantative Metrics

Task completion rate

Response time

Error rate

Cost savings

Throughput

Resource utilization

Customer satisfaction score (CSAT)

This measures how satisfied employees and customers are with AI agents.

Net Promoter Score (NPS)

On a scale of 0 to 10, how likely are you to recommend our AI tools to a colleague?	
Promoters (9–10)	Above 0: Good
Passives (7–8)	Above 20: Favorable
Detractors (0–6)	Above 50: Excellent
	Above 80: World-class

Demo: Using Integrations with AI Agents

Human-AI Teaming and AI Agents

“From this point forward...we will be managing not only human workers but also digital workers.”

– Salesforce CEO Marc Benioff

Use Cases

Market research

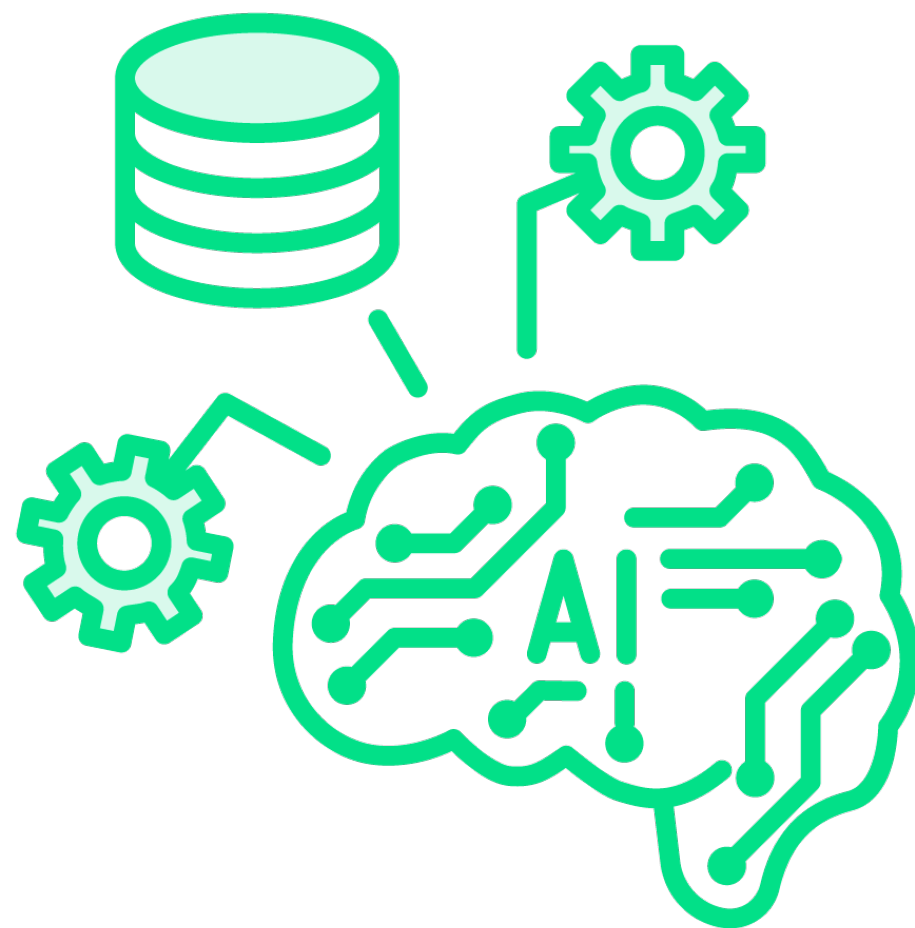

Legal analysis

Scientific research

Security analysis

Medical procedures

Shared mental models

Transparent communication

Adaptive learning

Dynamic role allocation

Ethical and governance considerations

Preparing the Workforce

**Employees must
understand AI
capabilities**

**Foster effective
collaboration**

**Support employees
for changing roles**
